

SHAH ABDUL MAZID

AI/ML ENGINEER

Generative AI | LLMs | RAG | Computer Vision | NLP

📍 Dhaka, Bangladesh ✉️ shahabdulmazid.ezan@yahoo.com
☎️ +880 1531329222 🔗 LinkedIn 🐙 GitHub 🎓 Google Scholar

Professional Summary

AI/ML Engineer with a B.Sc. in Computer Science and Engineering from East West University, majoring in Intelligent Systems and Data Science. Experienced in Generative AI, LLMs, RAG, Machine Learning, Deep Learning, Computer Vision, and NLP. Skilled in building AI applications using Python, PyTorch, TensorFlow, FastAPI, Pinecone, OpenAI APIs, and AWS. Passionate about AI research and developing intelligent solutions for real-world problems.

Technical Skills

Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL

AI / ML: Machine Learning, Deep Learning, Transfer Learning, Model Evaluation, Data Preprocessing

Generative AI: Generative AI, LLMs, RAG, Prompt Engineering, AI Agents, Agentic AI, Multi-Agent Systems

NLP: Natural Language Processing, Semantic Search, Vector Search, Embeddings, Sentence Transformers, Document Q&A, AI Chatbots

Computer Vision: Object Detection, Image Classification, Medical Imaging, YOLO, OpenCV, Grad-CAM, CBAM Attention

Frameworks: PyTorch, TensorFlow, Keras, Scikit-learn, NumPy, Pandas, Matplotlib, Plotly

Backend: FastAPI, REST APIs, JWT Authentication, API Integration, PDF Processing

Frontend: React, Next.js, Streamlit, Gradio

Databases: Pinecone, Vector Databases, MongoDB, MySQL, SQLite

Cloud / DevOps: AWS, EC2, Docker, PM2, Git, GitHub

Automation: n8n, Workflow Automation, API Integration

Education

B.Sc. in Computer Science & Engineering
East West University

Major: Intelligent Systems & Data Science

Higher Secondary Certificate
Dhaka Ideal College

Science

Secondary School Certificate
Badshah Faisal Institute

Science

Languages

Bengali — Native

English — Professional Working Proficiency

Research Interests

- Generative AI and Large Language Models
- Retrieval-Augmented Generation
- Multi-Agent AI Systems
- Healthcare AI
- Computer Vision and Medical Imaging
- Natural Language Processing
- Intelligent Recommendation Systems
- Model Interpretability

Career Focus

AI/ML Engineering

Generative AI

LLM and RAG Systems

AI Research

Computer Vision

Data Science

Tools & Platforms

Models & APIs: OpenAI API, Llama 2, Mistral, Claude API, HuggingFace Models

Vector DBs & Search: Pinecone, Weaviate, Milvus, Chroma, FAISS

Deployment: Hugging Face Hub, AWS SageMaker, Docker Hub, Streamlit Cloud

Dev Tools: VS Code, Git, GitHub, Jupyter, Google Colab, Linux/Ubuntu

APIs & Integrations: OpenAI API, Google Maps, Stripe, Google Sheets, Anthropic API

Key Achievements

- Published research on interpretable ML for agricultural disease diagnosis (ICCIT 2025)
- Built enterprise RAG platform processing 10,000+ documents with 95%+ accuracy
- Developed traffic detection system for real-world Bangladesh traffic conditions
- Designed multi-agent AI system handling complex enterprise workflows
- 9+ IBM and AWS certifications in AI/ML specializations

Professional Highlights

Published Researcher: MangoStack ensemble model published in ICCIT 2025

RAG Specialist: Built enterprise platforms for document-based Q&A systems

Full-Stack AI: End-to-end ML systems from training to production deployment

Automation Expert: n8n workflow automation for business process efficiency

Professional Experience

AI Engineer July 2026 – Current
Neuroxyte — Narayanganj, Dhaka Division, Bangladesh

- Developed and deployed AI/ML solutions using Generative AI, LLMs, RAG, and intelligent automation.
- Built AI-powered applications and backend services using Python and FastAPI for scalable model integration.
- Designed and implemented LLM-based workflows, conversational AI systems, and retrieval-augmented applications.
- Integrated external APIs, AI models, and third-party services to deliver end-to-end AI solutions.
- Optimized AI workflows and model pipelines for improved reliability, scalability, and operational efficiency.
- Researched and applied emerging techniques in Generative AI, LLMs, RAG, and AI automation.

AI Engineer Feb 2026 – May 2026
Softvence Agency — Dhaka, Bangladesh

- Developed RAG-based chatbots using Large Language Models for intelligent question answering.
- Built scalable FastAPI backend services for AI model deployment and integration.
- Developed Text-to-Speech and voice generation systems for interactive applications.
- Automated workflows using n8n to improve operational efficiency.
- Integrated APIs and external services for end-to-end AI solutions.
- Researched and implemented emerging Generative AI, LLM, and RAG techniques.

Selected Projects

Nexus Intelligence
Enterprise Multi-Agent AI Platform

Built a full-stack enterprise AI platform for secure question answering over private documents, spreadsheets, and web content.

- Implemented RAG and multi-agent architecture.
- Integrated Pinecone vector search and live data routing.
- Added feedback memory, JWT authentication, and PII detection.
- Developed Next.js frontend and FastAPI backend.
- **Tech:** FastAPI, Next.js, React, TypeScript, OpenAI, Pinecone, RAG, AWS.

HR Policies RAG Chatbot
AI-Powered Document Q&A

Developed an AI chatbot capable of answering HR policy questions from PDF documents using semantic retrieval and LLM generation.

- Implemented PDF processing and document retrieval.
- Used vector search and sentence embeddings.
- Developed interactive Streamlit interface.
- **Tech:** Python, FastAPI, Streamlit, Pinecone, Llama 2, NLP.

Bangladesh Traffic Flow Dataset
Deep Learning Vehicle Detection

Developed a deep learning system for vehicle detection and classification under Bangladesh traffic conditions.

- Implemented YOLO-based object detection.
- Applied Grad-CAM/EigenCAM for model interpretation.
- Built interactive inference using Streamlit and Gradio.
- **Tech:** PyTorch, YOLO, OpenCV, NumPy, Pandas.

Brain Tumor Detection and Classification
MobDenseNet with CBAM Attention

Developed a hybrid deep learning model combining MobileNet and DenseNet with CBAM attention for MRI-based brain tumor classification.

- Implemented preprocessing, augmentation, and classification.
- Evaluated accuracy, precision, recall, and F1-score.
- Applied Grad-CAM for model interpretability.
- Deployed the model using Streamlit.

WhatsUpIn
AI-Powered Travel Recommendation Engine

Developed an automated AI travel recommendation platform generating personalized travel plans.

- Integrated OpenAI for itinerary generation.
- Automated workflows using n8n.
- Integrated Google Maps, Google Sheets, and Stripe.

Publication

MangoStack: A Lightweight, Interpretable Ensemble for Real-Time Mango Leaf Disease Diagnosis
Authors:Raiyan Gani,Yusuf Salehin,Md.Shakil Bhuiyan,**Shah Abdul Mazid**,Monisha Bani Nibedita Shuci, Shamim Ripon
2025 28th International Conference on Computer and Information Technology (ICCIT), IEEE, pp. 2235–2240.
DOI: 10.1109/ICCIT68739.2025.11490181

Certifications

- IBM Deep Learning with PyTorch, Keras and TensorFlow
- DeepLearning.AI TensorFlow Developer
- IBM Machine Learning
- IBM RAG and Agentic AI
- Building AI Agents and Agentic Workflows
- IBM AI Developer
- AWS Generative AI and AI Agents with Amazon Bedrock
- IBM AI Engineering
- IBM Data Science

Competitions & Awards

Network War — EWU Telecommunication Club, 2024
IT Olympiad — CSE FEST, East West University, 2024
In House Programming Battle — EWUCoPC, 2022
